

Jo

Jo is a synthesis of design, pleasant lines, sobriety and functionality. The shell is made in polypropylene, a single piece flowing from the back top to the forelegs. The structure leans on steel legs. The versatility of this piece is seen in the wide range of colours and finishes available to customers. The shell is available in anthracite, blue, cream, red, brown, green, salmon pink, white and the frame can be chromed or aluminium (many versions) or white painted. Jo is also a stackable chair, has ergonomic shape and it is very solid, a safe choice for all residential and contract needs either for indoor and for outdoor.

Test Catas: Static load on the seat and back UNI EN 1728:2000

Designer: Robby Cantarutti

Depth: 49 Width: 40 Height: 84 Height seat: 46 cm
