

## METALIA

Steel plate panels with three-dimensional holes.

Perforated metal panels with holes of varying sizes to reproduce figurative or abstract images: this is Metalia. The Raster Punch® technology creates timeless images filtered through a simple yet elegant interplay of light, for unique visual emotions enhanced by acoustic comfort.

Sound-absorbing materials secretly play their role below the surface, while a backlighting system lights up the room with a subtle charm.

A modern, attractive system to turn public buildings, homes or multi-purpose rooms into spaces that are pleasing to the ear and beautiful to the eye.

A window that gives onto comfort and wellness.

### Data Sheet:

Painted 10/10 sheet panels, 20 mm thick rear polyester fiber pad; it can be integrated with other products (Listen, Concretech, Decovox) by changing panel thickness.

- Punched with patented system RASTERPUNCH with customised patterns and drawings upon request.

- Density 40 Kg/m<sup>3</sup>

### Mounting System:

Wall M32.

### Dimensions:

600 x 600 x 16-18-21 mm

1200 x 600 x 16-18-21 mm

1000 x 3000 x 16-18-21 mm
