

## New materials to top Dizzie

Dizzie is a demonstration of something that may seem obvious but can have unexpectedly pleasing results: a sole change in color or material can radically alter appearance and attitude. With a deceptively simple, visually striking silhouette, Dizzie tables (in 50cm height) take on a sophisticated turn with subtly textured dark grey base and MDF veneered tops in brushed black, brushed white and natural oak.

The sensuous, organic shape of the base suggests a drop of mercury. The finely grained, matte surface of the top is a tactile, sensuous cut through that sleek surface.

Design by Lievore Altherr Molina, 2013
