

## Tool

Small table collection for home and contract furniture. Three legs metal frame available in two different heights. Top can be made of varnished metal sheet, HPL, white Carrara marble, black Maquinia marble.

Really an industrial object, designed thinking of all the phases of realization and assembly, Tool is born as a neutral table to match the numerous families of upholstered products of the company. The centrepiece of the project is the 3D laser cutting technology from which it is derived a geometric and essential aesthetic as well as an intelligent system for building this object. Available in two heights, up and lower one, and in different colours.
