

Bed Design 06

Wooden bed with storage, modern style.

Delo proposes a bed system of great comfort, with a wide range of design, containers materials and modularity which makes them suitable to all situations and tastes. The wide choice of backs, basis and containers, goes from the simple and linear forms, to models of particular aesthetics and choice of materials, coverings, with components finished in wood or in padding parts.

A special box under a bed can contain the unexpected: not only objects or memories; it has to contain precious materials, careful carvings, new clean concepts and wise techniques: Delo's beds contain indeed more and more...
