

## Glassystem COM/GS5

What is Glassystem? With the use of thick extra clear tempered glasses and polished chrome connectors, (also available in several powder coated ral colour finishes), Glassystem is a real revolution in the furniture market, both for commercial spaces and for private homes. Its elegance, practicality, lightness, transparency and solid construction offer an impressive aesthetic impact. Last, but not least, all materials are 100% recyclable. On request, the elements can be completed with the latest generation led lighting systems, giving 90% energy saving, no heat production and 50000 hours durability. Every single piece is produced in our plants through the use of highly sophisticated computer aided systems, (the glass cutting, drilling and grinding processes are completely automatic).

The great versatility and modularity of the Glassystem collection, providing a wide range of wood or glass elements, will offer you the possibility to you create the composition which best suits your needs and the result will be better than you could imagine: aesthetically pleasing and sophisticated components, clearness, solid construction, great capacity, long-life are only some of the features of this innovative and eco-friendly product. Not a chance if we obtained the certification "patented model" from the patent office.
