

Q3

Single shell in 100% pure Polypropylene reinforced with 10% fibre, available in 11 colours, of which 3 are Class 1 and always available in stock (anthracite AN/29, cream CM/71, blue BL/14); the other colours are also available for minimum orders of 100 chairs per colour. 4-leg frame, with or without armrests, on castors or glides, made from Ø 18 mm structural steel, available in the following finishes: N (black), BI (white), CR (chromed) and VA (aluminium grey). HS (high stacking) skid base made from Ø 11 mm steel rod. Choice of different finishes coordinating with the colours of the shell. Two types of under-seat shell, for 4-leg frame chairs and skid structure chairs, in colours matching the shell. Horizontal bar skid base for mounting the Fast desk, made from Ø 11 mm steel rod; finish N (black), BI (white), CR (chromed) and VA (aluminium grey). Option of upholstered padding on the seat only or all over the front of the chair, available in all standard coverings. Option of concealed hook for the 4-leg version, with or without armrests.

The result of a historic, fruitful partnership between Giovanni Baccolini and Sesta, the new Q3 series joins the existing Q2 with a shell in beech plywood, and sets out to achieve an impressive level of quality and comfort – thanks to the ergonomic form and flexibility of the shell – as well as design, through the energy and expressive potential of the colour. With the Q3 series, Sesta's conference range expands to include an easy stacking chair (Skid version on carriage, for up to 35 units); it's ideal for conference halls or rooms with a high number of visitors. In functional terms, Q3 will offer all of the same variations as Q2: fixed and swivel versions, stools, swivel chairs with cross base or 5-star base, and bench-mounted seats; a variety of solutions are available in a wide range of on-trend colours, or with singlecolour structure and seat.
