

Máni Wood 4L AR

Chair with armrests with steel frame and 3D basic veneer shell. Fixed cushion available.

Máni wood is the wooden version of the collection. The varnished basic veneer shell is produced using a 3D moulding technique, which enables highly resistant finished products to be produced that remain true to the designer's project. It can be combined with thirteen steel, aluminium or solid ash wood frames, and made even more comfortable with a fixed cushion covered in fabric, faux-leather or genuine leather. Like the polypropylene and upholstered versions, Máni Wood is also ideal for use in contract spaces, thanks to accessories such as coupling systems, armrests, writing tablets and chair trolleys.
