

Clivo 38

Die-cast aluminum table base, 38 cm height, polished or painted, combinable with round or square tops up to d80/80x80 cm (marble top, only up to d70/70x70 cm).

The name Clivo was inspired by the round section of the support and the base. It is a literary word, very emotive, that instantly conjures up something soft and curved. And indeed these tables work with an aesthetic that is expressed through the roundness of the structure and the top. Even when the top is square, the surface is still soft, always suggesting a feeling of warmth. Inspired by round shapes and gentle curves, Clivo is a collection of tables designed to accompany a variety of seating aesthetics, from the most essential to the most elaborate.

The tables have a round or square surface and a central support, round in shape or on four spokes for increased stability. Available in two heights and several finishes, from natural polished to painted aluminium, Clivo is a simple, versatile table that shows the seating to best advantage.
