

## Bio

In the eco-friendly path taken, the Bio chair represents for us a first great goal. Manufactured according to the European standards of ecological sustainability, Bio is actually made up only of materials universally recognized as recyclable.

The chair Bio can be stacked up to 10 pcs and it has seat and back in polypropylene and a rectangular-shaped steel pipe frame.

The seat is also available upholstered and covered with fire-proof fabric Mirage or fire-proof eco-leather Planet.

The Bio's accessories, to purchase separately, are: the spacer bar, the storage tray, linking devices, the trolley-chairs and the trolley for writing tablets.
