

Mixis

Mixis is the new chair from Crassevig, designed by Mario Ferrarini and made of plywood of variable thickness which sits perfectly on a solid wood base. Its two materials, plywood and solid wood, differ in their structural and aesthetic values, but connect together perfectly, creating a chair with fluid, delicate lines. The seat, skilfully and naturally joined to the base, is also made of plywood. Stackable in piles of four, Mixis comes in the natural colours of beech or oak or painted with an open pore effect. Also available with an upholstered seat.
