

Cucina AS design

AS kitchen design, prestigious in lacquered RAL, beautiful details of high-level peninsula snack bar and dining table area.

Tailored projects, is the most informal, for those who choose a practical kitchen, which easily adapts to all spaces.

Infinite finishes, different combinations, but always with the quality and style of AS design.

A single project, simple, linear, is more than a kitchen, it is a living space, richness of detail and care for the build quality: a lot of technology and precisely defined volumes, a space organized, the basics are the highest, and depths more generous, to hold all the better.
