

## New Age Art. NA042

The chairs feature a streamlined design and delicate champagne lacquers that highlight their graceful silhouette. The backrests are carved with the hallmark motif of the collection, and the upholstery rounds it all out with a touch of nature-inspired fashion.

The New Age collection is built to rigorous modern standards.  
The main features are:

- structure in veneered mdf blockboard to maximise stability of the lacquering
- Fronts in sandblasted solid oak
- Lacquered finishes combined with sandblasted surfaces and mother-of-pearl decoration
- interiors in solid ash or oak
- drawers made using the ancient dovetail method of joints
- patented model

The inspiration for the New Age Collection is contemporary and the items are made using innovative techniques. Decorations and finishes are created using unique processes developed by Cantiero in order to produce high quality furniture. Examples are lacquering, sandblasting and the addition of real mother-of-pearl.
