

TORNADO TA1B5

TORNADO is a modern extendable table with metal basement and stoneware or glass top. The central basement is available in delicate painted metal finishes like white or graphite, with a refined brushed silver effect, or with a warm vintage brown.

The stoneware top is relatively compact in its 130 cm, very resistant thanks to the quality of the material, and guarantees up to ten seats once the extensions are completely open.

Also for the top, you may choose different finishes including: cement or graphite, for a simple and modern combination with white or graphite base, or maybe arabesque, emperador or carrara marble-effect stonewares if you want to give more liveliness to the environment.

L 130 / 200 P 90 H 75 cm
