

BILBAO SG194

The BILBAO height-adjustable modern stools are design furnishing elements conceived to be comfortable and versatile: the seat and base shapes and colours are coordinated, and equipped with a piston that adjusts the height of the seat according to your needs – so as to make it possible to use them as an emergency chair. Moreover, together with Bilbao chairs it is possible to create a very harmonious set of shapes and colours, thus further enhancing the overall image of your home.

Not only design and beauty, but also attention to details such as the satin-finish steel plate that protects the paint on the point where the feet rest against wear and scratches. Quality materials and great design. BILBAO stools are among the flagship products of Target Point's modern collection thanks to the combination of design and materials: on the one hand, they feature slender lines that are perfect for a kitchen or a modern living, and on the other they feature all the resistance of metal (strictly painted) and the comfort of the Soft-Touch cover.

In order to better match them with the other kitchen elements, BILBAO stools are available in four different colours: ice grey, graphite, rope and brown, perfectly matching the Vintage Soft-Touch cover of the seat, available in ice grey, graphite, turtledove and tobacco.
