

Lampo L5C14

ALIAS, a new identity. A highly flexible system of bookshelves made up of standard wall-mounted modules with open units and sliding doors. The modules can have a height of 255, 335, 415 mm and a width of 1200, 1500, 1800, 2100, 2400, 2700, 3000 mm, ensuring broad flexibility of composition and installation in the living area. This is in addition to the various options involved including colours, joining backs and geometric relationships between the various modules, always with reduced overall dimensions and extensive creativity.

L5C14 composition with ALIAS wall units in Cenere stained oak, with sliding doors in Bianco 10 polished glass and LAMPO wall unit in matte Bianco 10.
