

## Buffet-Roll

Program of buffet tables on wheels with a pure and elegant design to suit any functional area. These tables are also height adjustable and modular. Tables are square 80x80cm and rectangular 175x80cm or 190x80cm; they are height adjustable at four different heights, 74cm, 89cm, 104cm and 115cm. Can be used as buffet tables, as high cocktail tables or as dining tables. Tables are modular, easy to move and to set up in the desired configuration. Tables in different heights slide underneath each other when not on use and allow to save a lot of space.

Frame is made of four "U" shaped metal elements, two of them 45x45mm and two telescopic 40x40mm; frame is in steel epoxy powder coated in the colours of the Ral scale. Upper part of the frame is provided with four support points to accept a glass or a plastic laminate top. Each frame is fitted with four wheels diameter 50mm, two braked.

Table top is available in the following versions: 19.6mm high in plastic laminate at choice with a flat edge in rigid Abs in the same colour as the plastic laminate; 70mm high in plastic laminate at choice with a flat edge in rigid Abs in the same colour as the plastic laminate; 70mm high in plastic laminate at choice with a flat edge in natural beechwood; 8mm high in transparent glass. Tops are fitted with four support spacers.

Thanks to their flexibility and multifunctionality, these tables are particularly recommended for hotels, restaurants and bars. They can be used in a banquet, dining, breakfast and any multi purpose room.

Buffet tables on wheels are entirely manufactured in the European Community.
