

504/B

The prestigious and majestic table is customizable, both in size and shape. The table top is decorated with inlaid polychromous veneers while the basements are carved in solid lime tree wood, polished and gilded in gold leaf. The colors and the patterns of the table top decoration are customizable as well.

All around the table a whole room can be conceived and realized using the same motifs that characterize the table top; they can be used indifferently to adorn custom sized cabinets and boiseries.

The floral inlaid pattern on each cabinet refurbish a tradition of antique techniques and elegantly tailors them with precious and luxurious fabrics. The result of this perfect match is an endless combination of patterns and colors, capable of guaranteeing the highest customization and personalization of the room.
