

Botero Mignon

The chair comes in a single size and a number of different bases, frames and colours (the same as Blog and Q3). The padding for Botero Mignon is made from self-extinguishing, CL1 fire-retardant, cold-formed Polyurethane foam. This environmentally-friendly chair (using 30% recycled material) consists of two separate elements – seat and backrest – joined during assembly. The model has provision for two-tone upholstery (code BM-MIX), which can also be made using different categories of upholstery.

Botero Mignon comes in several versions with corresponding variants: fixed with 4-leg base in solid natural beech wood or in a range of covering matt lacquers, or with Skid base made from steel rod (Ø 12 mm) in various finishes and colours. Swivel with 4-star Spider base in a range of finishes and colours, or 5-star Spider base with castors or glides; the cross base swivel version with glides is available with "Torna" automatic seat return.

The new Botero Mignon series was created to complement the Botero series, adding colours and new elements to the family. With the arrival of Botero Mignon, the whole range is enhanced, in turn making it easier for designers to manage and optimize spaces thanks to the three seat sizes (Mignon armchair, Botero armchair and sofa) plus the pouf, and to the different shapes of the occasional tables (round, oval, rectangular and square). The versatility of the frames - available in a range of colours - supplements the diversified seating options and enables the Botero family to keep a playful and informal feel, and a positioning that works well in different environments.
