

Square

Square is characterized by a lightweight, aluminium structure just 28 mm thick. The heat is distributed very evenly on the radiating surface thanks to a special finned plate coupled to the back. It comes in a rectangular or square shape, in water or electric version, and can be installed either vertically or horizontally. The coordinated 'maniglione' element completes the functionality of Square with a handy electric towel warmer that can be combined with the radiating unit in a great variety of aesthetic solutions.

Design : Ludovica + Roberto Palomba
