

## WIND 105

Wind: the range of operating high-back chairs. As the wind that follows all the forms, also the back of Wind ergonomically follows the lines of our back. 620 mm in height for the backrest confirming that Wind is ideal both as a business as semi-directional.

The Wind range consists of 2 models: Version with the backrest in black or white mesh for maximum breathability. Fully upholstered backrest version and integrated height adjustment for maximum elegance. For the full range Wind we use the Synoro-tilt mechanism with multiblock system and Max opening angle between seat and back up-to 21° and antishock to avoid back pain during the unlocking mechanism itself. Poggianuca support with adjustable height by 6 cm and depth and coordinated with the padded seat. Lumbar support coordinated to the color of the network that can be white or black, of easy and intuitive use.
