

## Master

Linear and simple bed, but at the same time is looking important for the large size for the bed-base frame and for the particular headboard with panel box. Multilayer structure for bed-base frame, covered with fibers of polyurethane foam, the mattress is recessed about 3 cm. Possibility for storage-base with mechanism liftable. Headboard with wooden frame covered with undeformable polyurethane foam and polyester fibers. Complete removable covers just for the bed base, not for the headboard. Black or satined feet.
