

Máni Wood ST-ADJ

Swivelling stool with central column adjustable base. Steel footrest can be chromed or painted. The ashwood Máni shell, made with 3d pressing technique, can be refined with fixed cushion or countershell upholstered with certified coverings for contract market. In addition to wools, trevira, velvet, faux leather and genuine leather proposed by Armet, it is possible to upholster Máni Wood accessories with fabrics or leathers supplied directly by the customer.

Painted ashwood Máni shell is made with 3d pressing technique, which allows to realise finished, resistant and faithful to the designer's project wood products. Máni Wood can be combined with 13 different chair and stool bases available in steel, aluminum or solid ashwood. The strength of Máni Wood system lies in the transversal use of the seats, recommended for indoor hospitality and residential spaces, but also perfect for the community sector thanks to professional accessories such as bench frames, hooking devices, armrests, tablets and trolleys for handling. Wood shell can be refined with a fixed cushion upholstered with fabrics, faux leather or genuine leather.
